

Project Initialization and Planning Phase

|               |                                                         |
|---------------|---------------------------------------------------------|
| Date          | 15 March 2024                                           |
| Team ID       | UNM293SmartStudyAI                                      |
| Project Name  | ComicCraft - AI Comic Story Creator using Gemini Models |
| Maximum Marks | 3 Marks                                                 |

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

|                                      |                                              |                                     |                                                 |                            |
|--------------------------------------|----------------------------------------------|-------------------------------------|-------------------------------------------------|----------------------------|
| I am                                 | I'm trying to                                | But                                 | Because                                         | Which makes me feel        |
| Aspiring comic creator / storyteller | Turn my story idea into an illustrated comic | I can't draw and lack design skills | Manual comic creation is slow and needs artists | Frustrated and discouraged |

| Problem Statement (PS) | I am (Customer)                                                  | I'm trying to                                                          | But                                                                 | Because                                                                                | Which makes me feel                                                |
|------------------------|------------------------------------------------------------------|------------------------------------------------------------------------|---------------------------------------------------------------------|----------------------------------------------------------------------------------------|--------------------------------------------------------------------|
| PS-1                   | A student or hobbyist storyteller with creative story ideas.     | Create a complete, illustrated comic story from a simple text idea.    | I have no drawing skills and no access to professional artists.     | Traditional comic creation is time-consuming and needs both art and writing expertise. | Frustrated, but hopeful that AI can bring my story to life.        |
| PS-2                   | A content creator or educator who needs engaging visual stories. | Quickly generate comic panels with consistent characters and dialogue. | Existing tools give inconsistent visuals and require manual effort. | They lack AI-driven story generation and scene-to-panel automation.                    | Optimistic about faster, creative storytelling with Gemini models. |
