

Empathy Map

Date	1 October 2026
Team ID	UNM293SmartStudyAI
Project Name	ComicCraft - AI Comic Story Creator using Gemini Models
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • "I have story ideas but can't draw them" • "Making a comic takes too long" • "I wish I could turn my script into panels"	THINKS • Can AI create consistent characters across panels? • Will the story and art actually match? • Is this easy enough for a non-artist?
ASPIRING STORYTELLER (Student / Creator)	
DOES • Writes plots and scripts in notes or docs • Searches for comic tools and art references • Experiments with AI prompts for text and images	FEELS • Frustrated by the lack of drawing skills • Excited to see ideas come to life • Worried the output may look generic
