

Empathy Map

Date	29 September 2026
Team ID	SWTID-2026-1156
Project Name	EduGenie: Google Gemini Powered Learning Assistant
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • "I need someone to explain this complex derivation in simple everyday terms." • "Why can't I just take a picture of this handwritten circuit and get an instant walkthrough?" • "Finding answers across 500-page reference PDFs takes way too much of my revision time." • "I wish I had a personalized AI tutor available at 2 AM before exam day."	PERSONA NAME (Engineering & STEM Student)	THINKS • "Am I lagging behind because standard textbooks don't match my learning pace?" • "Generic search engines give superficial or conflicting answers without grounding." • "If an AI can understand my uploaded lecture slides, I can study twice as fast." • "Multimodal Gemini AI could clarify my doubts without making me feel judged."
DOES • Scans multiple YouTube tutorials and discussion forums seeking clearer derivations. • Types long queries into chatbots only to get generic, ungrounded text replies. • Uploads handwritten assignment photos and textbook chapters into EduGenie. • Generates practice quizzes and audio-based summaries to test conceptual retention.		FEELS • Overwhelmed by extensive, dense college syllabus and multiple reference books. • Anxious about making mistakes on complex multi-step numerical assignments. • Relieved & Confident when EduGenie provides step-by-step multimodal guidance. • Empowered with 24/7 on-demand mastery of difficult academic concepts.

Key Takeaway: *EduGenie* addresses student anxiety and cognitive fatigue by utilizing Google Gemini's multimodal reasoning (vision + text + voice) to transform passive textbook reading into an interactive, 24/7 personalized learning experience.
