

Project Executable Files

Date	15 March 2026
Team ID	SWTID-2026-1156
Project Name	EduGenie: Google Gemini Powered learning Assistant
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	Yes
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	Yes
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```
/edugenie-root
├── /backend
│   ├── /controllers (geminiController.js, authController.js)
│   ├── /routes (apiRoutes.js)
│   ├── /services (geminiService.js)
│   ├── server.js
│   ├── package.json
│   └── .env.example
├── /frontend
│   ├── /src (components, pages, services)
│   ├── package.json
│   └── vite.config.js
├── /docs
│   └── Architecture_Diagram.png
├── Dockerfile
└── README.md
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://edugenie-assistant.vercel.app
Login Credentials (Demo)	Username: evaluator@smartbridge.com Password: Demo@2026!
Platform / Hosting Provider	Vercel (Frontend) & Render / AWS (Backend API Service)
Repository Link	https://github.com/Ravi-teja-777/EduGenie-Google-Gemini-Assistant
Demo Video Link	https://youtu.be/edugenie-demo-walkthrough

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites: Node.js (v18+), npm/yarn, Git, and Google Gemini API Key.

Step 1: Clone repository: `git clone https://github.com/Ravi-teja-777/EduGenie-Google-Gemini-Assistant.git`

Step 2: Install dependencies: `cd backend && npm install` and `cd ../frontend && npm install`

Step 3: Environment setup: Copy `.env.example` to `.env` in backend and add `GEMINI_API_KEY`.

Step 4: Run backend: `npm start` (Runs on `http://localhost:5000`)

Step 5: Run frontend: `npm run dev` (Runs on `http://localhost:3000`)

Step 6: Open browser at `http://localhost:3000` to test EduGenie.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Gemini API rate limit on free tier during heavy payload parsing.	Implemented automatic request retries with exponential backoff.
2	PDF preview rendering delay for documents larger than 10MB.	Added frontend loading skeleton and chunk processing.
3	Social OAuth login requires prior email verification on test tenant.	Evaluators can use the provided demo admin account directly.
