

Project Initialization and Planning Phase

Date	29 September 2026
Team ID	SWTID-2026-1156
Project Name	EduGenie: Google Gemini Powered Learning Assistant
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am A STEM Student preparing for exams	I'm trying to Master complex topics & solve tough problems	But Textbook explanations are rigid & confusing	Because Lack of instant, 24/7 personalized 1-on-1 tutoring	Which makes me feel Overwhelmed, anxious & stuck during self-study
---	--	---	--	--

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1 Core Need	An engineering student studying advanced STEM subjects.	Understand complex conceptual theories, derivations, and formulas from textbooks.	Traditional textbooks and static online videos do not answer my specific questions interactively.	Human professors and tutors are not available 24/7 during late-night exam revision.	Frustrated, stressed, and lagging behind in syllabus coverage.
PS-2 Multimodal	A high school student tackling handwritten homework problems and circuit diagrams.	Solve step-by-step mathematical calculations and science diagrams accurately.	Existing generic chatbots can only process typed text and cannot correctly parse handwritten notes or images.	Standard AI models lack deep multimodal vision-reasoning capabilities for diagrams.	Helpless and demotivated when stuck on a single assignment problem.
PS-3 Curriculum Q&A	A college student with vast course materials and syllabus PDFs.	Quickly review specific topics and extract verified answers directly from reference books.	Searching manually through 500+ page PDFs and disorganized lecture slides is extremely time-consuming.	Standard search tools find keywords but cannot synthesize accurate context-grounded summaries.	Overwhelmed by information overload and anxious about missing key exam topics.
